

# Vaibhavi Patil

## Summary

Frontend Web Developer with 3 years of experience specializing in **HTML**, **CSS**, **SCSS**, **JavaScript**, and **React.js**. Skilled in creating responsive, user-friendly websites and applications. Passionate about delivering high-quality, performance-driven solutions with a focus on clean, maintainable code. Strong problem-solving skills, focused on building scalable and efficient applications that meet user needs.

## Work Experience

### 1. ServeCoTrack1 (Carelton.com Support & Refactori (#Antem-UST))

Carelton Global Solutions is a top provider of data analytics, IT services, and business solutions for the healthcare industry. The platform connects patients with medical professionals to improve healthcare delivery and services.

#### Role & Responsibilities:

- Designed and developed reusable **AEM** components using **HTL (HTML Template Language)** for scalable and maintainable code.
- **Developed responsive UI screens** in line with Figma designs, ensuring a seamless user experience across devices.
- Conducted thorough **widget testing**, identified bugs, and implemented **bug fixes** to ensure high-quality performance.
- Integrated external **APIs** and implemented **data fetching and processing** logic to support dynamic content.
- Collaborated with cross-functional teams using **Jira** for task management and **Git** for version control.
- Utilized **HTML**, **CSS**, and **JavaScript** to develop the core web application features, optimizing for performance and accessibility.

### 2. Albertsons MSP Frontend development (MOON-SAFF-01-00)

Contributed to the development of **Albertsons MSP**, a web-based platform designed to optimize and manage various internal services within the organization. The platform integrates multiple functionalities, providing a centralized solution for employees to efficiently access and manage key services such as procurement, support, and operations.

#### Role & Responsibilities:

- Developed **responsive user interfaces** using **JavaScript**, **React.js**, and **Redux** for state management.
- Designed and implemented components with **Material-UI**, ensuring a modern, user-friendly experience.
- Utilized **HTML5** and **CSS3** to create structured, styled, and responsive web pages.
- **Collaborated with backend teams** to implement data fetching, user authentication, and ensure proper API integrations.
- Participated in **code versioning and collaboration** using **Git**, maintaining efficient workflows in team environments.
- Gained exposure to **MVC architecture** and **web app deployment** processes, contributing to platform launch and updates.

Company: UST Global
